APEX GLOBAL ENTERPRISE SECURITY DIRECTIVE - POL-SEC-2026-04

Section 4.1: Production Access Authentication Standards
All production Linux and Windows servers must enforce Multi-Factor Authentication (MFA).
Direct password-only SSH or RDP access is strictly prohibited across all production clusters.
Effective Date: January 15, 2026. Review Authority: Chief Information Security Officer.
Temporary exemptions must be approved by Security Governance and logged in the Exception Regist
